Automated analyzer for clinical chemistry

SPOTCHEM™ EZ

Simpler than ever operation with built-in centrifuge!

Whole blood samples can be measured easily and promptly with built-in centrifuge for pretreatment.

Continuous measurement, up to 9 items, is available.

Automatic calibration is completed in a second!

By reading the "magnetic card" attached to each test strip, variations among lots and changes with timing of test strips are automatically calibrated. Now users are totally free from complicated operation.

Measurement is so speedy.

Improvement of the sampling mechanism almost doubled the measurement speed at its maximum compared to the current model*.
